

# Surgical Face Mask

What you'll need:

printer, fabric, scissors, pins, string or elastic, needle, thread

Print this template, pin it to the fabric of your choice and cut it out. Do this twice and then pin the pieces together with either string or elastic. Try it out on your face. Then get to sewing (machine or by hand) or glue it!

The small dotted line is for the string or elastic you can use to attach this mask to your face.
